I have used my Endura on every kayaking and fishing trip since I got it. I have sawed through bait fish like mullet and lady fish. I have used it to fillet through armor-like fish scales. I have cut countless pieces of rope and line. I have even used the handle to pound apart blocks of ice. I have pretty much abused the heck out of my Endura over the course of dozens of kayak and fishing trips. It's still going strong and when I need to finally replace it, I will replace it with the exact same model. - **Jason from Florida**

Thank you so much for your unparalleled support of our military. You guys are awesome! I have owned Spyderco products in the past, but I have never been more proud of my OIF Native that you sent me. Thank you for your generous gift and for all you guys do. The next time I'm out west, I will drop by to thank you personally. Thanks again and God Bless. - **Matthew, Tan Native Military Lottery**

I am historically (in my opinion) probably the worst knife sharpener in the world. As a former outdoor guide, I have a love/hate relationship with my knives when it comes to sharpening. I Mean I've destroyed them all trying to restore the edge. Then I found the TriAngle Sharpmaker. After having it a couple weeks, all I can say is "hallelujah". It is an essential piece of my outdoor gear. I live in a log house and it even sharpens my axes. Worth every penny. - **James from South Carolina**

I have been a Spyderco customer for many years now and am extremely satisfied. The quality, ergonomics and performance of your knives is unparalleled by any other knife company. I have owned a saber ground Delica4 for the past few years and it is the best knife I have ever owned. I have put it through abuse that it was probably not suppose to withstand and it remains rock-solid from the FRN scales to the VG-10 blade. It's an amazing knife. - **Leland from Colorado**

29	30	<p>Last Wednesday we lost everything in a house fire. After the fire my son and I were looking through the debris and he saw something shining. It was my stainless handled Spyderco pocket knife. I was amazed that after such devastation we found a diamond in the rough. The knife is not as pretty as it was before but it still works perfectly which is great because I hope to be out hunting while the insurance company does their thing and we begin rebuilding our home. - Jimmy from Texas</p>

I have bought knives from just about every knife company. How do you do it? I have never seen a company like Spyderco where every knife made is nearly perfect in the hand. I love that you use high-grade premium steels instead of the same old boring 440C and 440A and the like. It also comes through your forums and advertising that your company has a good sense of humor. I like a company with a good sense of humor! Thanks for making great knives to carry all day and every day. - **Craig from North Carolina**

28	29	30	Thank all of you for the excellent job sharpening & reconditioning my knife. My knife has been to more countries than most people to include "Iraqi Freedom". I have nothing but faith that my Spyderco will do its job when I need it most. It has remained sharp after cutting on several different types of rope, com wire and all types of other materials. I own several Spyderco knives & have taken them to every climb & place. We have an official saying in the Marine Corps, "Semper Fidelis" which means always faithful. That is how I feel about Spyderco knives. Thank you again. - Jessie, Tan Native Military Lottery

I would like to thank you for the special edition Spyderco Native knife, as well as your very kind letter, both of which I received this week. It certainly means a lot to me that you and your company obviously do more than just think about soldiers deployed. The gift and letter, which I and others I am deployed with, received show a great level of genuine concern. My sincere thanks to you and your company. I wish you and your team only the best for a healthy and successful future. - **Matt, Tan Native Military Lottery**

CARBON (C)

Increases edge retention and raises tensile strength. Increases hardness and improves resistance to wear and abrasion.

CHROMIUM (CR)

Increases hardenability, tensile strength and toughness. Provides wear and corrosion resistance. Above 12% it yields what is generally acknowledged as stainless steel.

COBALT (CO)

Increases strength and hardness, and permits quenching in higher temperatures. Intensifies the individual effects of other elements in more complex steels.

NIOBIUM (NB) (columbium)

Relative to knife blade applications, Niobium readily forms NbC carbide within the microstructure which is an extremely stable and hard form of metal carbide. Such carbides provide excellent wear resistance and edge retention for a blade application.

COPPER (CU)

Increases corrosion resistance.

MANGANESE (MN)

Increases hardenability, wear resistance and tensile strength. Deoxidizes and degasifies to remove oxygen from molten metal. In larger quantities, increases hardness and brittleness.

MOLYBDENUM (MO)

Increases strength, hardenability and toughness of steel. Improves machinability and resistance to corrosion. Prevents high temperature creep. Helps retain fine grain size and is an effective substitute for tungsten in many high-speed tool steels.

NICKEL (NI)

Adds strength and toughness

NITROGEN (N)

Used in place of carbon for the steel matrix. The nitrogen atom will function in a similar manner to the carbon atom but offers unusual advantages in corrosion resistance.

PHOSPHORUS (P)

Improves strength, machinability and hardness. Creates brittleness in high concentration.

SILICON (SI)

Increases strength. Deoxidizes and degasifies to remove oxygen from molten metal.

SULFUR (S)

Improves machinability when added in minute quantities, but can decrease toughness.

TUNGSTEN (W)

Adds strength, toughness and improves hardenability.

VANADIUM (V)

Increases strength wear resistance and increases toughness. Limits grain size.

Integrity is being good even if no one is watching.™
