ON THE COVER...

REMOTE RELEASE™ We are proud to offer Spyderco's new Remote Release. The 1994 *Blade Magazine* award-winning design incorporates a bolt-action snap shackle for securing the knife to a belt loop, D-ring, rope, etc. Engineered to be worn below the waist, the ergonomic design allows the user to unhook the shackle leaving the thumb in the position required to open the blade. Like most Spyderco folders, the Remote Release opens one-handed via a hole in the blade's base, and closes one handed by means of a lock on the knife's back. The tough, light weight Zytel® handle (black only) features an interframe of rubberized Kraton® that ensures a secure grip in slippery conditions. Available in PlainEdge™ or SpyderEdge™. Suggested retail \$69.95.

MODEL #SP-C30 YOUR PRICE \$55.95

Blade Steel	GIN-1	Weight	2.7 oz.
Overall Length	7 7/8"	Handle	Zytel/Kraton
Edge Length	2 5/8"	Sheath	None
Blade Thickness	1/8"	Made In	Japan

MOKI LIMITED EDITION EVRINA SCRIMSHAW SERIES - Etched by LINDA KARST of Ingram, TX No collection is complete without these beautifully hand-scrimshawed knives. Showing Linda Karst's 16 years of experience, these handsome designs practically jump to life. Brushed stainless steel bolsters and liners highlight these Moki models in addition to the Evrina scales, a synthetic material with similar properties to natural ivory. Both knives, the tiger and the leopard, have been numbered one through fifty by Linda and the first twenty-five are sold in sets only. Suggested retail for the tiger model is \$499.95. Suggested retail for the leopard model is \$449.95.

Spyderco, Inc.

A. HUNTER™ The latest version of the Hunter has a new blade style for 1995. The drop-point blade features a 40/60 combination PlainEdge/SpyderEdge. This allows for skinning and caping while retaining the ability to cut through cartilage and bone. Suggested retail \$129.95.

MODEL #SP-C03PS YOUR PRICE \$103.95

Blade Steel	GIN-1	Weight	3.75 oz.
Overall Length	6 5/8"	Handle	Stainless Steel
Edge Length	2 5/8"	Sheath	None
Blade Thickness	1/8"	Made In	Japan

B. PRO-GRIP™ A lightweight version of the Pro-Venator™, the Pro-Grip features a Kraton insert on the Zytel handle as well as under the integral clip to attach securely to clothing. Crafted from Gingami 1 stainless steel, the 2 5/8" blade features a Plain - Edge/SpyderEdge configuration. Suggested retail \$79.95.

MODEL #SP-C33PSBK YOUR PRICE \$63.95

Blade Steel	GIN-1	Weight	2 oz.
Overall Length	6 3/4"	Handle	Zytel/Kraton
Edge Length	2 5/8"	Sheath	None
Blade Thickness	1/8"	Made In	Japan

C. PRO-VENATOR See page 10. Suggested retail \$129.95.

MODEL #SP-C13PS YOUR PRICE \$103.95

Blade Steel	GIN-1	Weight	4 oz.
Overall Length	6 3/4"	Handle	Stainless/Kraton
Edge Length	2 5/8"	Sheath	None
Blade Thickness	1/8"	Made In	Japan

D. SPUR™ A smaller version of the Pro-Venator, the Spur features the same drop-point blade and Kraton inlaid handle as its big brother, only with a 1/2" smaller blade measuring 2 1/8 inches along the cutting edge. Kraton inlay on the clip prevents the Spur from slipping out of your pocket. Available in 40/60 PlainEdge/SpyderEdge only. Suggested retail \$124.95.

MODEL #SP-C32PS YOUR PRICE \$99.95

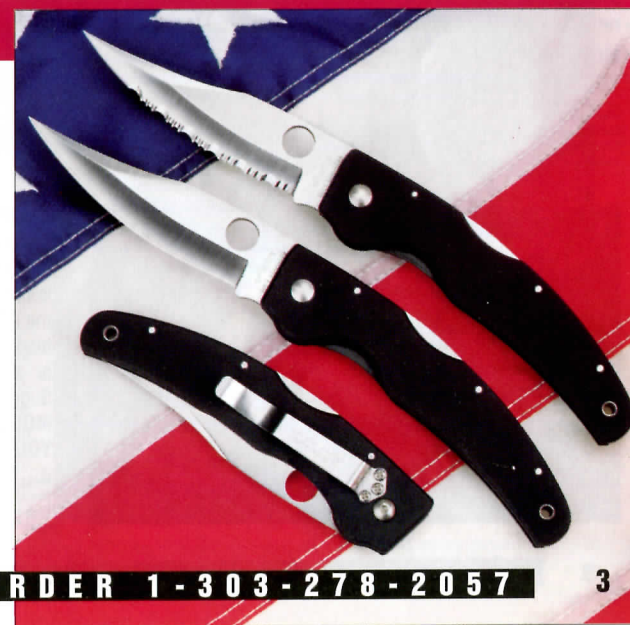

Blade Steel	GIN-1	Weight	3.1 oz.
Overall Length	5 5/8"	Handle	Stainless/Kraton
Edge Length	2 1/8"	Sheath	None
Blade Thickness	3/32"	Made In	Japan

Made in the USA

RENEGADE™ This 9" knife features the same modified clip point Bowie blade as its smaller counterpart, the Black Hawk™. The blade shares a finger choil with the G-10 handle - a tough epoxy resin on a fiberglass base. Available in PlainEdge or SpyderEdge. Manufactured in Golden, Colorado. Suggested retail \$119.95.

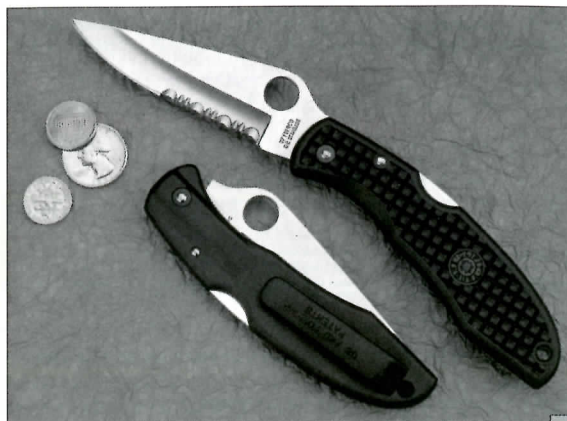

MODEL #SP-C23 YOUR PRICE \$93.95

Blade Steel	GIN-1	Weight	3.6 oz.
Overall Length	9"	Handle	G-10
Edge Length	3 1/2"	Sheath	None
Blade Thickness	1/8"	Made In	USA

Spyderco, Inc.

50/50 ENDURA™ New! The ever popular Endura is now available with a 50/50 PlainEdge/SpyderEdge blade style. This versatile combination allows you to have the best of both worlds. The large 50/50 blade provides over 1 1/2" each of PlainEdge and SpyderEdge. Suggested retail \$69.95.

MODEL #SP-C10PSBK
YOUR PRICE \$55.95

Blade Steel	GIN-1	Weight	2.75 oz.
Overall Length	8 1/2"	Handle	Zytel
Edge Length	3 3/8"	Sheath	None
Blade Thickness.....	1/8"	Made In	Japan

DRAGONFLY™ Designed to be the size in between the Delica™ and the Ladybug™, the Dragonfly is great for someone who wants a high quality knife just for small cutting chores such as opening boxes or envelopes. The handle is curved to fit comfortably in the hand and the pocket clip keeps the Dragonfly easily accessible. Available in either PlainEdge or SpyderEdge. Suggested retail \$49.95.

MODEL #SP-C28
YOUR PRICE \$39.95

Blade Steel	GIN-1	Weight	1.2 oz.
Overall Length	5 3/8"	Handle	Zytel
Edge Length	1 7/8"	Sheath	None
Blade Thickness.....	3/32"	Made In	Japan

CRICKET™ The small oval shape of this CLIPIT™ makes it the perfect size for a money clip. The light weight aluminum handle is treated with TUFRAM for superior scratch resistance and a Linerlock® is used for ease in one-handed closing. The patented reverse "S" curve is available in either PlainEdge or SpyderEdge. Suggested retail \$74.95.

MODEL #SP-C29
YOUR PRICE \$59.95

Blade Steel	GIN-1	Weight	1.72 oz.
Overall Length	4 5/8"	Handle 6061-T6 Aluminum	
Edge Length	1 5/8"	Sheath	None
Blade Thickness.....	1/16"	Made In	Japan

STANDARD™ The newest version of the Standard has all the features of its predecessor, but with a cleaner, finished look. The pocket clip is now mounted with three screws, instead of the stamped-out clip of the old Standard. The blade still features 6A stainless steel and is available in PlainEdge or SpyderEdge. Suggested retail \$94.95.

MODEL #SP-C05-2
YOUR PRICE \$75.95

Blade Steel	6A	Weight	3.8 oz.
Overall Length	6 5/8"	Handle	Stainless Steel
Edge Length	2 1/2"	Sheath	None
Blade Thickness.....	1/8"	Made In	Japan

Spyderco, Inc.

When introduced in 1981, Spyderco's CLIPITS™ were deemed too *ugly* to sell. As Spyderco continues to grow, they've proven that durability and function win over looks and beauty.

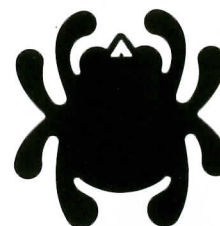

The success of Spyderco's purely functional knives is confirmed by the many awards they have won over the years. The **SNAP-IT** model won the "Overall Knife of the Year" award at the 1993 Blade Magazine Show. This makes the sixth year in a row that Spyderco has won an award at this show. It is the second time Spyderco has received the award for "Overall Knife of the Year".

The Snap-It is the ideal knife for active outdoorsmen. Whitewater rafters, climbers and backpackers know the sizeable amount of gear needed for their sport. They also know how important it is to have immediate access to their tools in dangerous situations. The Snap-It is secured by a snap shackle to attach the knife to a D-ring, zipper, or belt loop. It offers immediate access without compromising safety. The hole in the blade has been enlarged to facilitate opening one-handed when gloves or mittens must be worn. Even the size of the lanyard hole was increased for easier threading under adverse conditions. The snap shackle is metal reinforced for extra strength. You can be assured of a firm grip with the lightweight Zytel® handle inlaid with Kraton.®

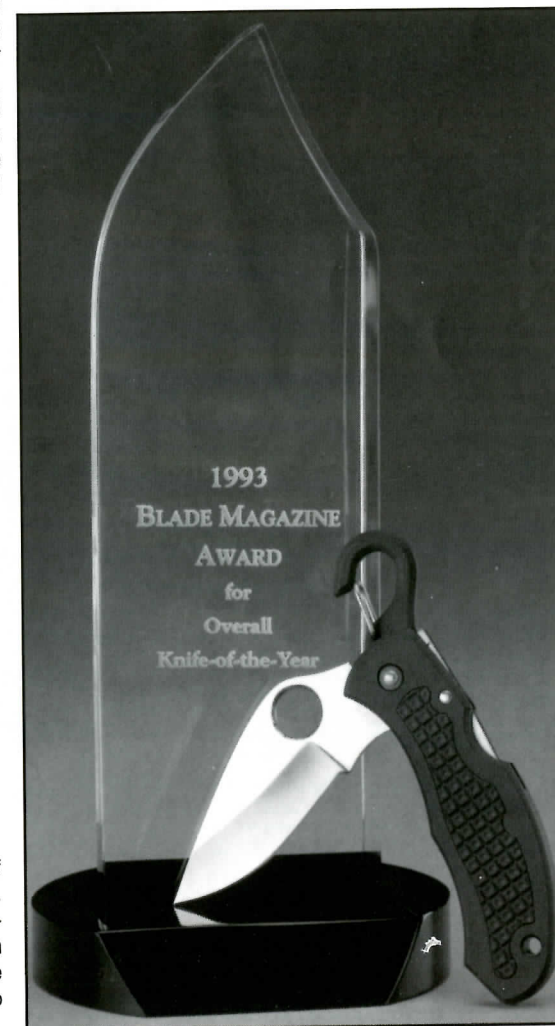

Available in SpyderEdge or PlainEdge and a choice of black or red handle color. Suggested retail \$69.95.

MODEL #SP-C26
YOUR PRICE \$55.95

Blade Steel	G2	Weight	2.4 oz.
Overall Length	6 7/8"	Handle	Zytel/Kraton
Edge Length	2 3/8"	Sheath	None
Blade Thickness	1/8"	Made In	Japan

We are proud to carry the full line of Spyderco knives and accessories. Most are pictured in our catalog, however, if you have a specific model in mind that doesn't show up in these pages, give us a call. We'll be glad to help.

Spyderco, Inc.

Over ten years ago, Spyderco's designer conceived an idea for the perfect pocket knife. This knife had four features he felt were essential. ■ **The first** was the simple idea of opening a knife with one hand—a concept taken for granted today. The design process went from a thumb-stud, to a lobe opener, to a rough scratch pattern. Next, a dent was tried, then a dent on both sides of the blade, and, lastly, the renowned hole in the blade! This has proven the easiest to grasp and open without getting in the way. ■ **The second** feature was to make the knife easily accessible. He knew that to gain instant access to the knife, it would have to sit at the top of one's pocket—no fumbling with a sheath or digging through pockets. From this the pocket clip was born. ■ **Thirdly**, he insisted low-maintenance be a requirement. Stainless steel was the best material available—practically maintenance free. This same material was used, not only for the blade, but for the handle, lock, spring, pins, and clip! ■ **The fourth**, and most important feature was maximum cutting power, supplied by the teeth. Since Spyderco was one of the first to put this edge on a pocket knife, it became known as the SpyderEdge.

POLICE MODEL Modified clip point blade with unsharpened false edge. Choose from SpyderEdge or PlainEdge. This model is also available left-handed.

Suggested retail \$149.95.
MODEL #SP-C07
YOUR PRICE \$119.95

BLACK HAWK™ For all you faithful Bowie fans, here's your 1st folding Bowie—CLIPIT™ style! The Black Hawk will probably be the most "hassle free" Bowie you'll ever own. You don't have to wait for excursions into the outback—you can carry and use it everyday. The clip permits comfortable carry in pocket, on boots or on a belt. (The fact that it is quite a bit smaller than traditional Bowies certainly adds to this comfort!) The clip point Bowie style blade is ground from GIN-1 stainless steel. A unique finger choil is created from both blade and handle when blade is opened and locked in place. Handle has been changed from anodized aluminum (shown in picture) to G-10. Spyderco's Black Hawk is proudly made in the USA and is available in SpyderEdge and PlainEdge. Suggested retail \$99.95.

MODEL #SP-C24
YOUR PRICE \$79.95

**MADE

U.S.A.**

Blade SteelGIN-1 Weight3.1 oz.
Overall Length . . . 7 1/8" HandleG-10
Edge Length2 7/8" SheathNone
Blade Thickness . . . 1/8" Made InUSA

Spyderco, Inc.

When you've set out for some invigorating exercise, you most certainly don't want to get weighed down with gear. So, whether you're hiking one of Colorado's famous fourteeners, forging a trail by mountain bike, or even just out for a brisk walk, Spyderco's CLIPIT™ Zytels are an essential tool. They save weight without compromising strength. Zytel is a nearly indestructible plastic made of a fiberglass filled nylon. This is the same material used in motocross motorcycle rims. Each Zytel has the convenience of a pocket clip and one-handed opening, along with a volcano grip handle pattern to provide a secure hold even when hands are wet.

MERLIN Designed to cut fishnet, but you'll find it useful in many marine applications. Available only in SpyderEdge and black handle. Suggested retail \$69.95

MODEL #SP-C21PSBK YOUR PRICE \$55.95

"I have purchased two Delicas from your company. It is a superb and efficient knife and is the only knife I use. It clips on anything and is quick to open with one hand. I am so used to this knife, I have trouble using other knives. Thank you for such an excellent product."—Joseph P. Arzaga, Brooklyn NY

Spyderco, Inc.

TUFRAM Police Model Available in SpyderEdge as well as PlainEdge. Suggested retail \$189.95
MODEL #SP-C07ATU
YOUR PRICE \$151.95

TUFRAM® This remarkable new coating adds longevity to these CLIPITs by making them virtually scratch resistant. TUFRAM is a special type of anodizing used in coating aluminum. The coating is very thin (only 3 microns) but makes the 6061-T6 aircraft aluminum scales very strong, yet still lightweight. The exposed rivets and darkened handles give these models a new look.

Blade SteelG2	Weight4 oz.
Overall Length9 1/2"	Handle6061-T6 Alumi-
Edge Length3 3/4"	num/Tufram coating	
Blade Thickness1/8"	Made InJapan

Blade Thickness1/8"	Made InJapan

Blade SteelG2	Weight1.9 oz.
Overall Length5 1/8"	Handle6061-T6 Alumi-
Edge Length1 3/4"	num/Tufram Coating	
Blade Thickness1/10"	Made InJapan

Spyderco fans in the Armed Forces suggested an all-black lightweight model. Spyderco answered with the Blak-Ti® Endura and Delica. Blak-Ti (Titanium carbo nitride) treatment provides additional rust and scratch resistance. The coating also increases surface hardness significantly, boasting a mighty 90 on the Rockwell C scale (an industry benchmark for hardness). An untreated Endura or Delica will measure 59 - 60 on the same scale. The blade, lock and spring on these models are treated with the Blak-Ti coating for added protection. The blade edge is not coated, however, to allow for sharpening. Both models available in SpyderEdge only.

BLAK-TI DELICA
Suggested retail \$72.95
MODEL #SP-C11SAF
YOUR PRICE \$57.95

Blade SteelGIN-1	Weight1.76 oz.
Overall Length6 7/8"	HandleZytel

YOUR PRICE \$68.95

Blade SteelGIN-1	Weight2.72 oz.
Overall Length8 1/2"	HandleZytel
Edge Length3 3/8"	SheathNone
Blade Thickness1/8"	Made InJapan

CIVILIAN™ Spyderco has traditionally designed work knives with specific uses in mind and up until now has never designed a knife as just a weapon. However, Spyderco has been involved with law enforcement for quite some time, and although the CLIPIT Police Model has been a favorite for many years, it wasn't designed expressly for self defense. After several requests from undercover law enforcement personnel, Spyderco produced the Civilian model. This would serve as the first of several folding knives designed and produced as a law enforcement back-up weapon. The patented reverse "S" curve provides a variety of aggressive contact points. 6061-T6 aircraft aluminum is used for the handle, which makes a blade of this size lightweight and easily carried. TUFFRAM coating on the aluminum is virtually scratch resistant and large Kraton inlay on both handle and clip provide sure grip. The Civilian is available in either SpyderEdge or PlainEdge. Suggested retail \$229.95. (This item is not being produced in large quantities, so availability may be limited.)

MODEL #SP-C12
YOUR PRICE \$183.95

Blade Steel G2 Weight 4.4 oz.
Overall Length . . . 9 1/8" Handle . . . 6061-T6
Edge Length 3 3/4" aluminum/Tuffram/Kraton
Blade Thickness . . . 1/8" Made In Japan

PRO-VENATOR This model was quickly adopted as a hunter's best friend. The classic drop-point blade shape has ideal features for skinning and caping and the combination edge gives the user the best of both worlds. The SpyderEdge at the base of the blade facilitates cutting through small bone or cartilage, while the increased belly of the PlainEdge works great for skinning and scraping. The tip of the blade is pointed enough for delicate caping as well. Soft rubberized Kraton inlay on the handle assures a secure grip should hands become wet. The Kraton inlay clip gives added confidence that the Pro-Venator will be in your pocket when you need it, and not back up on the mountain. The combination of all these features make the Pro-Venator the perfect folding field companion. This model is currently available in 40/60 PlainEdge/SpyderEdge only.

Suggested retail \$129.95.

MODEL #SP-C13PS
YOUR PRICE \$103.95

Blade Steel G2 Weight 4 oz.
Overall Length . . . 6 3/4" Handle Stainless steel
Edge Length 2 5/8" /Kraton
Blade Thickness . . . 1/8" Made In Japan

For more hunting designs see page 3.

LADYBUGS Spyderco's Ladybug is so easily carried, you'll never have an excuse to be without a knife! Attach it to your key ring, carry it in your pocket or toss it in your purse. The Ladybug incorporates all the features of its bigger counterparts, except for the clothing clip. Tough Zytel handle is practically indestructible. The G2 stainless steel blade is available in 50/50 SpyderEdge/PlainEdge only. Choose from handle colors of black, red, blue, and gray. Suggested retail \$29.95.

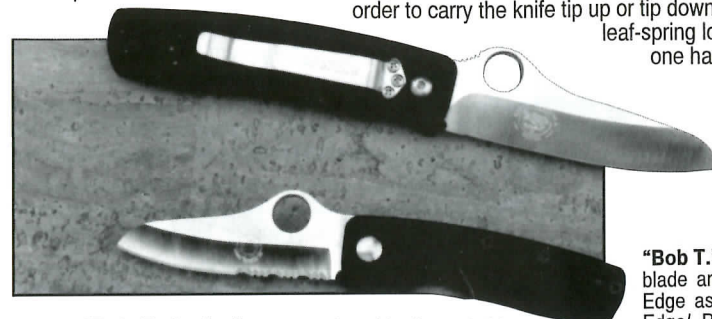

MODEL #SP-LB
YOUR PRICE \$23.95

Blade Steel G2 Weight 0.6 oz.
Overall Length . . . 4 1/2" Handle Zytel
Edge Length 1 3/4" Sheath
Blade Thickness . . . 1/16" Made In Japan

ROBERT TERZUOLA (ter - zoo - oh - la) of Santa Fe, New Mexico, has gained the respect of his peers for his efficient, high-strength designs that reflect a subtle military flavor. Spyderco's American-made CLIPIT showcases his 16 years experience as a master designer and knife-maker. The modified drop-point blade pivots between high-lubricity nylon bushings to ensure glassy-smooth action. Handles are cut from Spauldite® G-10, an epoxy-filled fiberglass composite. Scales are secured with high-tensile allen screws. Clothing clip can be remounted in order to carry the knife tip up or tip down. The stainless steel leaf-spring lock closes easily with one hand and a ball bearing detent prevents the knife from opening in your pocket.

The "Bob T. Junior" was introduced in June of '93 and has caught on fast. An inch smaller than its bigger brother with blade styles in PlainEdge and 50/50 combination. Also available left-handed. Sugg. retail \$115.95.

WAYNE GODDARD is another master in the design and building of folding knives with 30 years of experience to his credit. The ultimate culmination of the finest craftsmanship and materials have united at the drafting board and grinder to yield his design for the perfect CLIPIT. A micarta handle is used for strength, comfort, lightweight and good looks. Handle shape will also give the optimum in protection against sliding up on the blade. The skinning style blade is ground from G2 stainless steel and is offered in SpyderEdge and the ever popular 50/50 SpyderEdge/PlainEdge. And, of course, there is a stainless steel pocket clip for carrying convenience.

The largest in the Goddard family boasts a 3 1/2" blade and 8 3/4" overall length. This size makes an excellent hunting knife. Suggested retail \$159.95.

Spyderco Customs

JESS HORN Now you can afford one of the world's finest semi-custom knives. Hold it in your hand—feel the action—examine its quality design and craftsmanship. From the hand-jigged bone scales to the meticulously sculpted stainless clip secured by stainless hex screws, the folder boasts precise fit and finish. The ATS-34 spearpoint blade features milled pockets on both sides for easy one-handed opening. Even the lanyard hole features the same attention to detail—it's chamfered and lined. This collaboration between Jess Horn and Spyderco represents excellent value for collectors because they'd have to spend three or four times as much for a Jess Horn custom. Each knife comes in a padded zipper pouch and is available in PlainEdge or SpyderEdge. Suggested retail \$449.95.

SPYDERCO CUSTOMS

WALKER DESIGNED/KLOTZLI MADE H.P. Klotzli came up with the idea for a Swiss made CLIPIT™ of a Michael Walker design. Sal Glesser selected one of five designs presented and made sure it met his standards. The result of these three well-known sources brings us the most unique CLIPIT design to date. H.P. Klotzli of Switzerland carries on a tradition of knifemaking spanning over 100 years. His idea of scales composed of carbon fiber is unique, not only for the material itself, but also for the fact that it has never been used on a production knife before. Carbon fiber is expensive and is currently being used on racing cars and high performance aircraft. This material has become popular with the Swiss and is formed when carbon is stretched into a very thin fiber. The fibers are tightly woven into a pattern, creating a very strong weave, and then resin impregnated. The resulting material is strong and lightweight and has an amazing tensile strength. In fact, it is much stronger than steel in terms of tensile strength per weight.

Michael and Patricia Walker reside in Taos, NM, and have been considered one of the best husband/wife knifemaking teams in the world. They were one of the first knifemakers to begin using exotic materials such as titanium and made popular the Linerlock®. They actually own the registered trademark for Linerlock. The clip, spring, pivot pin and screws are all made from colored titanium, which is lighter and stronger than stainless steel. The color is achieved by passing an electrical current through the titanium. The amount of current determines the color produced.

THE WALKER/KLOTZLI incorporates all the Spyderco CLIPIT features: hole in the blade for one-handed opening, pocket clip for easy carry and, of course, Spyder-Edge serrations. The ATS-34 stainless steel blade is certainly a plus, as this steel is well-known for its edge-holding capabilities. Available in PlainEdge or 50/50 combination PlainEdge/SpyderEdge. Suggested retail \$399.95.

MODEL #SP-C22
YOUR PRICE \$319.95

EVOLUTION EDITION Prior to this set, Spyderco had never introduced a model specifically for collectors. The two knives in this set represent Spyderco's technological and design achievements over an eleven year time span. The original Worker came out in 1981 and was the first CLIPIT ever made. It has an old style clip which is secured by only two screws. The 1992 Worker has a damascus blade made by Tim Zowada of Kalamazoo, Michigan. The stainless steel handle is inlaid with Kraton® as is the pocket clip. Both knives are numbered and come with an acrylic display dome. Production of the Evolution Edition sets are limited to 1000 pieces and, unfortunately, neither of these two models will be sold separately. The mold for the original worker will be destroyed after this production run; so don't miss your chance to capture part of Spyderco's history with this one-of-a-kind collector's item. Suggested retail \$494.95.

MODEL #SP-C01COM 101-300 \$395.95

Pro-Culinaire

Professional chef quality, priced for the home gourmet.

Masahiro of Seki City, Japan makes Pro-Culinaire exclusively for Spyderco. Each blade is hand ground and hand sharpened for craftsmanship that is unequalled. Maximum edge retention is obtained by using MBS-26 stainless steel. Each blade is individually heat treated, oil quenched, and ice tempered. The handles are made from durable Sermollan (rubberized plastic), which provides excellent grip for wet or oily hands, and best of all—they're dishwasher safe.

A. PARING KNIFE This 2 5/8" paring knife was designed for in-hand cutting chores as well as gourmet decorating. It is not only petite, but strong, which lends itself as a favorite among wood carvers. Blade is 3/8" wide. Black handle and PlainEdge only. 6 1/2" overall length. Suggested retail \$23.95.
MODEL #SP-K09PBK
YOUR PRICE \$18.95

B. SANTOKU This Japanese vegetable slicer is a "must have" for your kitchen. After chopping and dicing, scoop food up onto extra wide blade (2 1/4") and transfer directly to skillet. The curved 6 7/8" blade allows an easily controlled rocking motion for fine dicing. Black handle and PlainEdge only. 12" overall length. Suggested retail \$50.95.

MODEL #SP-K08PBK
YOUR PRICE \$40.95

C. FILET KNIFE is no longer available.

D. SMALL UTILITY KNIFE This 4 1/2" blade is easily maneuvered for small cutting chores, paring and general cooking. Often used as a "deck knife" on professional fishing boats. 1" wide with black or red handle and available with SpyderEdge only. 10 3/4" overall length. Suggested retail \$22.95.

MODEL #SP-K05S
YOUR PRICE \$17.95

E. UTILITY KNIFE An article written by Mac Overton (a well known knife connoisseur), appeared in a popular consumer magazine, stating that this "may be the best all-around kitchen utility knife available..." 1 1/8" wide with black handle and SpyderEdge only. 10 3/4" overall length. Suggested retail \$28.95.

MODEL #SP-K04SBK
YOUR PRICE \$22.95

F. CARVING KNIFE Superb turkey carver! Also great for general cooking, slicing and dicing. 1 1/4" wide blade is 8 1/4" long with black handle. PlainEdge only. 13 3/8" overall length. **THIS MODEL HAS BEEN DISCONTINUED, SO SUPPLY IS LIMITED.**

MODEL #GB-MK1
YOUR PRICE \$79.95

AL MAR KNIVES

AL MAR We are proud to be able to provide you with some classic knife designs of the late Al Mar. Mr. Al Mar was a major influence in the cutlery industry. He created the specialty knife market with his Al Mar line. He was most generous with his knowledge in assisting companies like Spyderco and SOG in their early stages.

The classic design of the Eagle, Falcon and Hawk will last a lifetime. The smooth clean lines and sleek white micarta handles give these models a truly elegant look. All models incorporate the positive front lock which was designed and made popular by H. McBurnette and Al Mar.

EAGLE has a 3 3/4" blade length.
Suggested retail \$200.00.

Blade Thickness 1/4" Made In Japan

AL MAR KNIVES

ANGLER Fishing season never ends. Whether you're on ice this winter or casting your line in the Pacific, the Angler will do the job, regardless of the size of your catch. The molded indentation at the end of the handle works extremely well as a scoop for cleaning. A combination plain/serrated blade filets nicely and is superb for cutting line or bone. It even has a pocket clip for easy carry and access. Lightweight Zytel forms the handle and the inlay of fish may give you a little extra luck!
Suggested retail \$63.50.

MODEL #AL-ANG
YOUR PRICE \$49.95

Blade Steel 6A Weight 2.5 oz.
Overall Length 9 1/2" Handle Zytel
Edge Length 3 3/4" Sheath
Blade Thickness 3/32" Made In Japan

QUICKSILVER This model has all the durability of a stainless steel pocket knife without all of the weight. The vents in the handle add a distinct look while reducing the weight to a bare 3.5 ozs. Thumb stud and pocket clip allow for quick, one-handed opening and easy access. Finally, the combination blade gives enough versatility to cut just about anything. Sugg. retail \$57.50.

MODEL #AL-QKS
YOUR PRICE \$45.95

Blade Steel 6A Weight 3.5 oz.
Overall Length 7 7/8" Handle Stainless Steel
Edge Length 3 1/8" Sheath
Blade Thickness 1/8" Made In Japan

Blade Steel 6A Weight 8 oz.
Tool Length 6 1/4" Handle Stainless Steel
Serrated Blade 2 3/8" Sheath Leather
Plain Blade 2 3/4" Made In Japan

4x4 A perfect companion for the person who needs a set of tools wherever they go. The 4x4 has a plain edge blade, serrated edge blade, nail file, phillips head screwdriver, flat head screwdriver and pliers. The leather casing around the handle allows a secure and comfortable grip when using the pliers. A lanyard ring at the base of the handle closes around the pliers to lock in the closed position. Each one comes with a leather belt sheath so you'll never need to be without it. Suggested retail \$191.50.
MODEL #AL-4x4
YOUR PRICE \$152.95

Beretta U.S.A.

BERETTA began making guns in Italy almost 500 years ago. In 1983 they set their sights on a knife line. Since then, their expertise in the firearms field has been matched by a high caliber knife series. In 1993, Beretta added the International Guide knives which are made by Moki of Japan. The pleasure of owning a Beretta sidearm goes hand in hand with the look, feel, and quality of these fixed blade beauties. You can choose from handle materials of black linen micarta (shown in photo) or cocobolo wood scales. Each model is available in plain edge only and comes with a sturdy leather sheath.

OUTDOOR EDGE These award-winning knives give hunters and guides a design with features that have never before been offered in a conventional knife. Cutting with these skinners is a natural motion because the wrist stays straight and the forearm relaxed. Conventional knives bend the wrist causing fatigue and uncomfortable cutting positions. There's more to the handle than meets the eye. The T-shaped handle transfers force directly, providing greater cutting power for quartering. The unique shape of the handle also allows it to be secured between two fingers, enabling both hands to be used without setting the knife down. Lastly, the rubberized Kraton® handle eliminates any chance of the knife slipping. Each knife comes with a leather sheath.

SOLO

SOLO II

SOLO

SOLO The original goal in designing the Solo was to incorporate a production folding knife with a leaf-spring lock in hopes that the final product could, in time, become a classic. The leaf spring lock, directly influenced by Michael Walker and Robert Terzuola, is ideal in design because it is a positive lock and therefore ensures that it cannot close on the user's hand. Yet, because of the Solo's design, even the slightest pressure on the lock enables closure. Looking at the final product, one can see that the designer succeeded in his original goal, while not giving up any style or distinction that a classic deserves.

Known as the "Gentleman's Knife," this model is not only beautiful, it is purely functional. The sleek 1/4" thin design makes it comfortable to carry in a vest or suit pocket. The handle, made of black paper micarta, is designed to fit the hand, while its defined finger pads add extra control and comfort. The unique lobe opener and leaf-spring lock allow for easy opening and closing with one hand. This knife is sure to please even the most discriminating person. Available in PlainEdge or combination PlainEdge/SpyderEdge. Sugg. retail \$124.95.

MODEL #SO-1
YOUR PRICE \$99.95

Blade Steel G2 Weight 1.2 oz.
Overall Length 5 7/8" Handle Black Micarta
Edge Length 2 3/8" Sheath Synthetic Suede
Blade Thickness 1/16" Made In Japan

Introduced in May of 1993, the Solo II was designed for those wanting the same quality found in the original Solo, with almost an inch more cutting power. Perfect for those with larger hands. Available in PlainEdge or SpyderEdge. Suggested retail \$128.95. **MODEL #SO-2**
YOUR PRICE \$102.95

Blade Steel G2 Weight 1.9 oz.
Overall Length 7 5/8" Handle Black Micarta
Edge Length 3 1/8" Sheath Synthetic Suede
Blade Thickness 1/16" Made In Japan

GRYPHON KNIVES

The **GRYPHON** knives may be produced by a competitor of ours, but that doesn't keep us from recognizing top quality cutlery when we see it. Master knifemaker Robert Terzuola designed the Gryphon knives for Jeff Loffer of the Cutlery Shoppe. No short cuts were taken in producing these knives—they're built to last.

The **M35** Combat Utility is produced in true Gryphon style, yet designed to be more affordable. The 7 1/2" blade is constructed of 8A stainless steel. The notched thumb rest on the blade along with the checkered Kraton handle allows a firm grip. Suggested retail \$100.00.
MODEL #GY-35 **YOUR PRICE \$85.00**

Blade Steel 8A
Overall Length 13 1/4"
Edge Length 7 1/2"
Blade Thickness 3/16"
Weight 11.9 oz.
Handle Kraton
Sheath Cordura
Made In Japan

The **M10** is the ultimate in boot knives and is built to withstand any punishment you put it through. The 4" blade is crafted from ATS-34 stainless steel and measures a 58-59 on the Rockwell scale. The nearly indestructible handle is made from checkered Zytel. Features a notched thumb rest on back of blade, lanyard hole, cordura sheath, and also comes with a low profile shoulder harness. Suggested retail \$150.00.

MODEL #GY-10
YOUR PRICE \$135.00

Blade Steel ATS-34 Weight 4.5 oz.
Overall Length 8 1/2" Handle Zytel
Edge Length 4" Sheath Cordura
Blade Thickness 3/16" Made In Japan

SPYDERCO CUSTOMS

CENTOFANTE CLIPIT Frank Centofante of Madisonville, TN, has been a member of the Custom Knifemaker's Guild since 1971 and has been making knives for 25 years. The Centofante CLIPIT™ is his first production collaboration and this beauty boasts the traditional Centofante blade shape for which he is famous. The steep drop point gives a sleek look as well as being functional. The handle is 6061-T6 anodized aluminum for weight reduction and strength with stylish filework on the spine. The 2 7/8" blade is flat ground from ATS-34 stainless steel and incorporates a leaf spring lock.

The Spyderco pocket clip appears on the right scale and a rubberized insert on the left scale.

Available in three color schemes—light blue anodizing with dark blue rubberized inlay, gray anodizing with green inlay or gray anodizing with black inlay. Available in PlainEdge or SpyderEdge. Sugg. retail \$124.95. **MODEL #SP-C25** **YOUR PRICE \$99.95**

Blade Steel ATS-34 Weight 2.5 oz.
Overall Length 6 7/8" Handle 6061-T6 Aluminum
Edge Length 2 7/8" Sheath
Blade Thickness 3/32" Made In U.S.A.

IRONSTONE COTICULES

NATURAL SHARPENING STONES YESTERDAY'S BEST MAY BE TODAY'S AS WELL

Hundreds of millions of years ago, when the earth was forming and changing, there were some areas that formed with unusual chemical developments. Examples of this are the large deposits of diamonds that ended up in South Africa and the oil deposits in the Middle East. The deposits of Novaculite and Coticule were of special interest to cutlers. Speculation as to how these substances formed range from meteoric occurrences to chemical reactions, but no one is really certain. Novaculite is a combination of silica and quartz highly compressed or fused into a very dense, hard, sedimentary rock. It is found only in a region of the southern United States and is known as the "Arkansas Stone." Coticule is a similar dense rock that is made up of compressed garnets. It is found only in the northern region of Belgium. This unique creation of nature is known as the "Belgian Razor Stone." Geological surveys estimate a known supply of over 200 years for the Arkansas mines and about 50 years from the Coticule mines. Many professionals believe that the finest edge can only be obtained by hand sharpening on natural stones. *Ironstone* is pleased to be able to provide the finest medical grade Coticule and Novaculite in the world today. A "must own" for today's cutlery lover.

IRONSTONE COTICULES

Smith's

SMITH NATURAL ARKANSAS STONES:

(Novaculite) The Smith family, of Hot Springs National Park, AR, has been in the natural Whetstone business since 1886. The stone used by Smith's is high grade Novaculite (from the Latin word Novacula, meaning "sharp knife"). The only place in the world Novaculite is found is within a 15 mile radius of Hot Springs. Indians in the 18th and 19th centuries came to Hot Springs from all over the country to acquire this valuable stone. Each stone is hand crafted and passes 8 quality inspections before being shipped out. Oil should be used with these stones to wash away small particles of metal.

This **TRUE CUT** stone measures 8" x 2" x 1/2". Black Arkansas is an extra fine grit leaving a mirror polish and an edge legends are made of. Comes in a cedar box with angle guide and instructions. Both sides can be used for sharpening. Suggested retail \$63.94.

MODEL #SM-XTC
YOUR PRICE \$57.50

These **WIDE HONES** are a full 2 1/2" wide. Ideal for wide planer blades, chisels and woodworking tools. Stone is 8" long and 1/2" thick and is securely mounted to a cedar block so only one side may be used. Base has holes for mounting to a workbench. A cedar lid is included along with angle guide and instructions.

MEDIUM grit (soft Arkansas)
Suggested retail \$33.46.

MODEL #SM-MW
YOUR PRICE \$30.10

FINE grit (hard Arkansas)
Suggested retail \$50.46.

MODEL #SM-FW
YOUR PRICE \$45.40

HONING OIL is a highly refined, premium mineral oil (not a petroleum base). Excellent lubricating properties—a little goes a long way. Suggested retail \$2.70.

MODEL #SM-OIL
YOUR PRICE \$2.40

MULTI-HONE includes four 8" x 1 5/8" x 1/2" stones:
FINE—(white) Natural Arkansas for final finish and polish
MEDIUM—(grayish) Natural Arkansas for general purpose sharpening
COARSE—(dark gray) Silicon Carbide for fast cutting action
FINE—(orange) Aluminum Oxide for smooth cutting edge

Multi-Hone also features built-in angle guides for each stone and plastic base acts as an oil bath for easy lubrication. The stones are secured by a unique locking device which allows optional stones to be added. Non-skid feet are attached to the base and a plastic cover snaps over top for storage. Honing oil sold separately. Suggested retail \$60.00.

MODEL #SM-4
YOUR PRICE \$54.00

◀ **IRONSTONE COTICULES:** (Belgian Razor Stones) Mining experts bond the Coticule to another rare stone, which is a by-product of the quarry. This dark colored stone is called "Rouge-de-lasalm" and is generally not used for sharpening (although it can be) but rather, is used to support the razor stone. Belgian Razor Stones come only in professional medical grade and are used with oil or water. The use of water being a convenient advantage. The cut-offs from shaping these rectangles are called Bouts-Belges. Bouts-Belges are an ideal pocket size and give you an opportunity to own a piece of soon to be extinct sharpening stone!

Spyderco, Inc.

Spyderco's Tri-Angle Sharpmaker gives you professional results in a matter of minutes and is easy to use. The simple set of instructions show you how to sharpen:

- kitchen knives
- serrated knives
- scissors
- pinking shears
- fish hooks
- darts
- router bits
- wire cutters
- nail clippers
- potato peelers
- screwdrivers
- and more

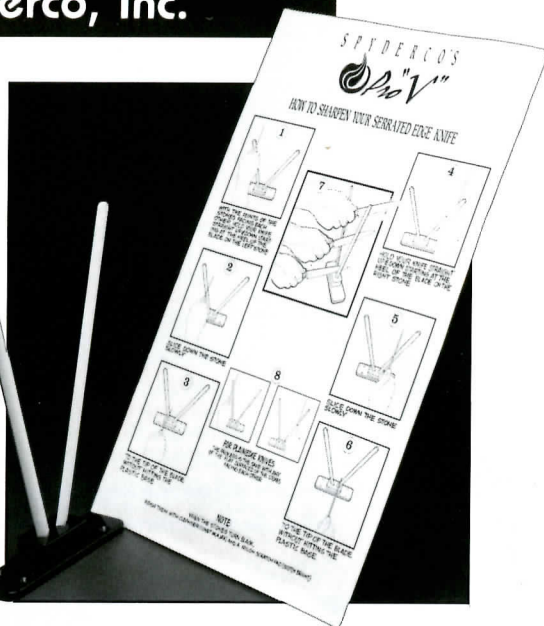

TRI-ANGLE SHARPMAKER Includes ABS plastic base, 2 brass safety guards, instruction manual, cordura carry case, 2 fine grit triangle stones and 2 medium grit triangle stones. The stones are made of High Alumina Ceramic and require no oil or water. The durable, nylon cordura case has internal sleeves to prevent stones from being chipped. Base holds stones at a 40° angle. Sugg. retail \$49.95. **MODEL #SP-203MFC**
YOUR PRICE \$39.95

DIAMOND SPEED SLEEVES These coarse sleeves slide over Tri-Angle stones. Great for sharpening out small nicks or shaping up a dull edge quickly. Sleeves should be used with water to prevent premature wear. Not for use with serrated edge knives. Suggested retail \$36.95. **MODEL #SP-203DS**
YOUR PRICE \$29.95

DELUXE TRI-ANGLE SHARPMAKER Same as regular Tri-Angle Sharpmaker, plus 2 diamond coated speed sleeves. Suggested retail \$79.95. **MODEL #SP-203DX**
YOUR PRICE \$63.95

CORDURA CASE Sturdy nylon pouch with velcro closure and internal sleeves. Suggested retail \$8.95. **MODEL #SP-203C**
YOUR PRICE \$6.95

#1 RECOMMENDED SHARPENER
FOR SERRATED EDGE KNIVES!

▲ GALLEY-V This larger sharpener is great for commercial applications such as restaurants, food processing, meat packing, etc. Great for serrated edge knives. Includes ABS base with holes to secure sharpener to a flat surface, 2 fine grit cat's eye stones and instructions. Base holds stones at a 30° angle. Suggested retail \$49.95. **MODEL #SP-601V**
YOUR PRICE \$39.95

GALLEY-V REPLACEMENT STONES Fine grit only. Suggested retail \$19.95. **MODEL #SP-601F**
YOUR PRICE \$15.95

TRI-ANGLE REPLACEMENT STONES Specify fine or medium grit. Sugg. retail \$10.95. **MODEL #SP-203-1**
YOUR PRICE \$8.95

Ceramics cannot be guaranteed against breakage.

Spyderco, Inc.

CERAMIC WHETSTONES Each stone is constructed of "High Alumina Ceramic." The Alumina particles (synthetic sapphires) are mixed with a ceramic bonding agent. The stones are shaped, compressed at high pressures and then fired in kilns in excess of 3,000° F for as long as three days. The finished product is able to cut any metal known to man and has very desirable qualities: they are so hard that very little or no wear will be experienced; because these stones are used dry there is no water or oil to clean up; and finally, they leave a very high polish on the surface being sharpened.

The Benchstones measure 2" x 8" x 1/2" and come in a plastic case with rubberized feet to prevent sliding during use.

ULTRA FINE GRIT
Suggested retail \$44.95. **MODEL #SP-302UF**
YOUR PRICE \$35.95

YOUR PRICE \$29.95

GREAT AMERICAN TOOL COMPANY

located in Getzville, NY has been perfecting sharpeners for 5 years. The GATCO Edgemate knife sharpening system is not only the most popular system they make but one of the easiest of its kind to use.

The GATCO EDMATE KNIFE SHARPENING SYSTEM

contains: coarse medium, and fine honing stones with integral sliding guide rod; knife holder and angle guidance fixture; honing oil; carrying case and instructions. Five sharpening angles range from 11° to 25°. Screws can be turned by hand—no coins or screwdrivers needed. Hones are 5" x 3/4" and made of aluminum oxide. Sugg. retail \$38.99. **MODEL #GC-3 YOUR PRICE \$31.50**

EZE-LAP

EZE-LAP in Westminster, CA, pioneered diamond sharpeners in the early 70's. Their diamond bonding process has been imitated, but never truly duplicated. Eze-Lap has patented the heat treating process that bonds the industrial diamonds (DuPont Poly-crystalline) to a flat metal substrate. The resulting surface measures 72 on the Rockwell C hardness scale.

The legendary **MODEL "M"** is the original diamond sharpener developed by Jay Fletcher almost 20 years ago. It is the hallmark of the Eze-Lap line. The rugged brass handle acts as a handle as well as a sleeve to protect the 3 1/2" diamond coated shaft. 1/4" in diameter. Leather sheath provided.

MODEL #EL-M YOUR PRICE \$19.95

THE DIAMOND PEN SHARPENER is ideal for serious fishermen. Its 2 3/16" sharpening surface has an 1/8" flat side, a groove for fish hooks on the other side and weighs in at only 1/2 an ounce. Stores inside the pen cap and clips into your pocket like a ballpoint pen.

MODEL #EL-S YOUR PRICE \$5.95

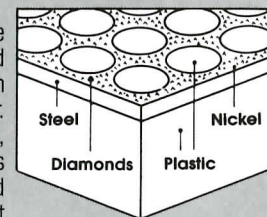

This **DIAMOND ROUND** is unbeatable in keeping your kitchen knives in top shape. The fine diamond shaft actually sharpens, whereas most "steels" just straighten out the edge. Shaft is 7 1/2" x 7/16" with a plastic handle. **MODEL #EL-G YOUR PRICE \$28.95**

DIAMOND MACHINING TECHNOLOGY, INC. was founded in 1976 for the purpose of producing industrial diamond tools, such as saw blades and grinding wheels. After developing and refining some diamond hones from the leftover centers of grinding wheels, the Diamond Whetstone line took over.

DMT's unique whetstone construction consists of a strong plastic base, which is injection molded with a specially perforated steel face. Nickel is then electroplated onto the steel with micron diamonds partially embedded in the nickel. The plating causes the polka-dots to be recessed, which not only aids in removing steel, but acts as a reservoir—trapping the steel removed from knife or tool edge.

The **8" BENCHSTONE** offers large surfaces of diamond for larger knives and tools. Comes in a redwood case with non-skid feet. Also has mounting tabs to secure stone to a workbench. Stone is 2 5/8" wide and is available in fine or coarse grit. Suggested retail \$79.50.

MODEL #DM-8 YOUR PRICE \$71.50

6" BENCHSTONE is 2" wide and comes in a plastic case with non-skid feet which can be mounted to a work bench. Available in fine and coarse grit. Suggested retail \$41.00.

MODEL #DM-6 YOUR PRICE \$36.90

This versatile **POCKET STONE** can be used on knives, food processor blades, hand tools, router bits, garden tools, great for skis...the list is endless! Stone is 3" x 7/8" and fine grit only. Comes with a leather sheath. Suggested retail \$18.00.

MODEL #DM-F3 YOUR PRICE \$16.20

Fine grit **10" DIAMOND STEEL**

is a dual acting sharpener that both removes steel to maintain sharpness and realigns bent edges. Shaft is 3/8" in diameter and has a plastic handle.

Suggested retail \$36.50.

MODEL #DM-FS YOUR PRICE \$32.85

The **DIAFOLD™** models are housed in a self-storing, fold away handle that remains permanently attached. The folded handles create a compact storage case that you can toss into a tackle box, backpack or toolbox.

The **DIAFOLD WHETSTONE** is 4 3/8" x 7/8" and fine grit only. Sugg. retail \$24.50. **MODEL #DM-FD YOUR PRICE \$22.00**

The **DIAFOLD SERRATED KNIFE SHARPENER** is 4 1/2" long with diameter ranging from 1/4" to 1/16". Suggested retail \$25.00. **MODEL #DM-FDS YOUR PRICE \$22.50**

LANSKY SHARPENERS

LANSKY SHARPENERS began thirteen years ago in Buffalo, NY. They began with the standard three hone system and now have a wide selection of sharpening systems to choose from. Ironstone is pleased to provide you with three of their more popular systems.

A The **FOLD-A-VEE SHARPENER** is perfect for hunters, fishermen, backpackers, and campers since it is especially designed for field use. It is portable, lightweight, and folds into a compact pocket size. The high alumina ceramic rods are medium grit and can be set at 17° or 25°. The feet allow you to stabilize the sharpener on uneven surfaces. Suggested retail \$15.99.

MODEL #LK-FV
YOUR PRICE \$14.30

C

B The **CROCK STICK** offers two stage knife sharpening for fast and easy results. Sharpen first on the narrow 17° angle for thinning and then on the wider 25° angle for sharpening. Has a separate angle for sharpening scissors. Comes with two medium grit rods, two fine grit rods, oak base, and plastic hand guard. Rods are High Alumina ceramic and store under the base. Suggested retail \$34.99.

MODEL #LK-CS **YOUR PRICE \$31.40**

C The **STANDARD LANSKY SHARPENING KIT** contains: coarse, medium, and fine hones; knife clamp with angle selector, three guide rods; honing oil; carrying case; extra screws and instruction guide. Select four sharpening angles from 17° to 30°. Hones are 4" x 1/2" and made of aluminum oxide. Suggested retail \$34.99.

MODEL #LK-3 **YOUR PRICE \$31.50**

D The **ERASERBLOCK** works great for rubbing away the metal deposits left on your ceramic sharpening stones. Works equally well on porcelain sinks, tile floors, tile grout, formica and marble counters, glass, auto chrome, fiberglass boats...and more! For stubborn spots or discolorations, just wet spot or Eraserblock with water. Suggested retail \$4.99. **MODEL #LK-EB**

YOUR PRICE \$4.40

E **CROCK STICK REPLACEMENT STONES** Specify fine or medium grit. Suggested retail \$7.99.

MODEL #LK-R
YOUR PRICE \$7.20

G-SAKAI

More than 750 years ago, the swordsmiths of Japan became attracted to and settled in a small town, called Seki City, in the Gifu mountains. The location possessed iron-laden soil and abundant water. The mountains provided constant breezes and mild temperatures. As the centuries passed, countless sword makers developed their art within the confines of this town. The Katana (Japanese sword) remains a legend today.

Seki City is also the home of G. Sakai, world renowned for the quality craftsmanship of its hand-made knives. While maintaining the spirit of these sword makers, G. Sakai collaborates with some of the best knife designers in the world. Performing magic in steel and modern materials brings their designs to life. Considering strength, performance, fit and finish, G. Sakai consistently produces the best knives in the world. The spirit of the Samurai comes alive when using knives hand-made by G. Sakai.

CERAMIC SCISSORS Razor sharp ceramic blades may never need sharpening! The best part about these scissors is that there are no metal parts, which means no corroding or rusting. Great for use in salt water environments—cutting leader lines, etc. Perfect for clipping articles, pictures or coupons, as the paper will never dull them. The handles are made from Zytel and come in yellow or black. Comes with a leather sheath. Suggested retail \$69.95.

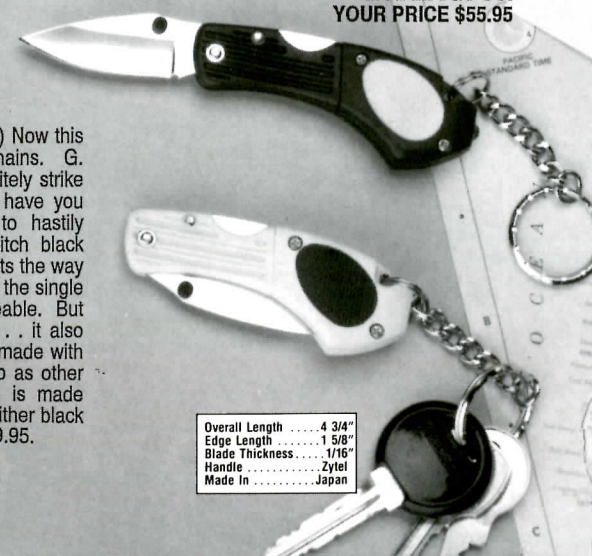

MODEL #GS-SCI
YOUR PRICE \$55.95

HOTARU (Japanese for firefly) Now this really is the ultimate in keychains. G. Sakai's latest design will definitely strike your fancy. How many times have you scratched your paint trying to hastily unlock your car door in a pitch black parking lot? This keychain lights the way with a fine focus red beam and the single cell battery is easily replaceable. But wait, it's not just a keychain... it also includes a 1 5/8" pocket knife made with the same quality craftsmanship as other G. Sakai knives. The handle is made from Zytel and is available in either black or yellow. Suggested retail \$39.95.

Blade Thickness 3/32" Made In Japan

G-SAKAI

KATABA Perhaps the best folding knife available for the gardening arts. The unique kataba grind uses a single-bevel blade grind on the front side and a hollow grind on the back. (Similar to a sushi knife.) The resulting edge is strong, sharp and ideal for pruning and grafting. The concave (hollow grind) side of the blade is held adjacent to the part of the plant to be used. Being constructed of stainless steel handle, blade, and leaf-spring lock means low maintenance.

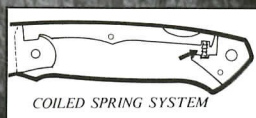

Suggested retail \$79.95.

DEBA & SASHIMI

For the discriminating chef who seems to have everything. Chances are, this chef hasn't yet had the pleasure of using these beautiful kitchen knives produced by G. Sakai. The larger handle gives complete control of all your cutting and slicing chores. The wide blade on the Sashimi keeps your knuckles from hitting the cutting board. Both the Deba and Sashimi are given the kataba grind which provides all the strength of a double bevel grind with a much thinner cutting edge. The kataba grind slices quickly and cleanly and forces the food to fall away from the knife. Two sizes available in each blade style.

Suggested retail \$99.95.

COLD STEEL

COLD STEEL is known for their durability and strength, but probably most recognized for the extreme torture testing they put their knives through. The re-introduction and popularity of the tanto, bowie, and kukri can be attributed to Cold Steel's Lynn Thompson, who has proved to be one of the industry's trend setters. In addition, Dan Maragni has greatly helped in Cold Steel's success with his eye for quality and materials innovation. The abilities of these two gentlemen have surely pushed Cold Steel to the forefront of the knife industry.

SRK (Survival/Rescue Knife) Survival and rescue operations demand a versatile knife with the ability to endure severe abuse. With this in mind, Cold Steel designed the SRK. This 3/16" thick clip point blade is tremendously strong yet possesses a fine enough tip for meticulous cutting jobs.

Suggested retail \$84.00.
MODEL #CS-SRK
YOUR PRICE \$75.95

TIMBERLINE

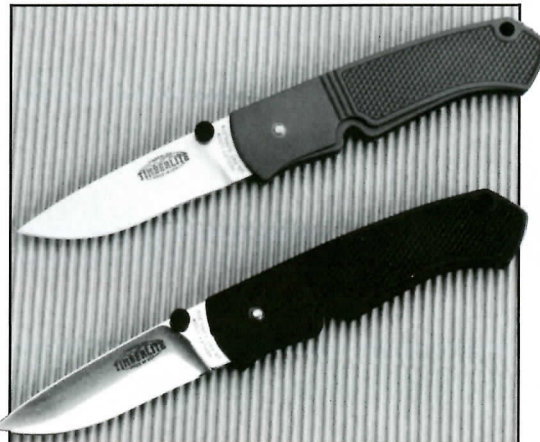

TIMBERLINE In 1990 Vaughn Neeley invented one of the most novel and noteworthy locking systems for a knife. It soon became known as the NeeleyLock™ and is now the cornerstone of Timberlite knives. This innovative design allows its user to open and close the knife with no levers or locks to push in the handle area. The lock is released by moving the *blade* outward by either pulling or pushing forward with the thumb buttons. An advantage of this locking system is that while pressing the tip of the knife into an object, the lock is actually driven tighter. Made entirely in the U.S.A., they are knives you can be proud to carry for more than just their convenience and quality.

THE TIMBERLITE Voted *Blade Magazine's* "Overall Knife of the Year" for 1991. These light weight, nylon handled knives are a unique addition to any pocket. Available in black, olive-green or clear handle colors. The olive-green model has a subdued finish on the blade. Suggested \$34.95.

Edge Length 2 3/8"	Sheath
Blade Thickness 3/32"	Made In U.S.A.

Spyderco, Inc.

LAGUIOLE (pronounced La • yol in French) This beautiful design originated in a French village of the same name. Since the early 1800's this village has been famous worldwide for the small scale manufacturing and unique design of this particular knife. Cutler Pierre-Jean Camels originally designed the Laguiole's sleek recognizable features. The round, downward curving handle and long slender blade give this age old design a truly distinguished look. The bee on the handle has become known as the Laguiole logo, due to the large amount of bees that swarmed throughout the village.

Spyderco's Laguiole incorporates the same basic features with which it was originally created. They have given it added elegance with sleek black handles accented with brass liner and pins. A positive front lock is used and the traditional bee sits at the base of the blade. A beautiful form fitted leather sheath is provided. Available in a SpyderEdge or PlainEdge version. Suggested retail \$119.95. **MODEL #RC-L**

YOUR PRICE \$95.95

Blade Steel G2	Weight 2.6 oz.
Overall Length 8 1/2"	Handle Plastic
Edge Length 3 1/2"	Sheath Leather
Blade Thickness 1/8"	Made In Japan

TRU-BALANCE

Harry McEvoy, designer and crafter of Tru-Balance knives, passed away in January of '93 but his legend lives on as one of the foremost experts in the knife throwing arena. His son, Stephen McEvoy, carries on the tradition of producing some of the best throwing knives available. These knives are crafted to combine form with function and easily withstand the punishment of being thrown repeatedly at wooden targets. Tru-Balance performance sets the standard among professional knife throwers and amateurs alike.

We are proud to carry the **Sport-Pro**, Tru-Bal's most popular throwing knife. This model is designed for throwing in the professional style. It combines all the best features of throwing knives used by the world's greatest professional throwers. It is hurled equally well by handle or blade for amazing accuracy (of course, this takes a bit of practice and control). The super-tough tempered spring steel from which the knife is crafted will stand up to a lifetime of rugged use.

MOKI

**SPECIAL
INTRODUCTORY
OFFER**

MOKI FLOWER KNIFE Designed for grafting, this botanist's tool will satisfy your delicate vegetation-cutting chores and will stay sharp up to ten times longer than other floral knives! The curved blade, coupled with a single-bevel grind, produces a very clean cut with little effort. Fitting comfortably in the hand, the large rounded handle also incorporates a honeycomb pattern which provides an excellent grip, even when wet. No need to lay down your project to open this knife—the Moki Flower Knife opens one-handed via the thumb stud on the blade. Available in either right- or left-handed models and with red handle and plain edge only. Suggested retail \$54.95.

MOKI

Moki's long tradition of excellence doesn't prevent it from being an innovative company. These light weight designs demonstrate the wisdom of combining new materials with historic craftsmanship. The black Zytel model with honeycomb-textured handle won't slip even if your hands are wet. The red or yellow Zytel models feature a black elastomer insert that provides a resilient, leatherlike feel. All models open one handed (left or right) via a reversible thumb stud. Like their more expensive models, these folders offer Moki's famous design and execution throughout. As gifts, they express your appreciation for quality and precision. Each model is available plain or serrated.

MOKI

Mr. Moki Sakurai assumed responsibility of his father's "one man" knife factory which first opened in 1907 in Seki City, Japan. Over the years, the name Moki Sakurai became associated with high quality and his knives were referred to as Moki's Knives. As a result, the name was changed to Moki Knife Company in 1987.

The Moki Knife Company produces exquisite embellishments on the handles of their folding knives, which has earned them over 180 design and utility patents. Their forte is inlay work using exotic materials. We believe that no factories and few custom knife makers in the world can match Moki in this area.

SILVERFEATHER This beautiful addition to the Moki line combines form with function and further demonstrates Moki's attention to detail. Its sleek design fits comfortably in vest or trouser pocket. But don't take this gentlemen's knife lightly! The spearpoint blade, polished to a high sheen is made of 8A stainless steel that keeps a razor sharp edge. The brushed stainless steel handle features the traditional positive rear lock, lanyard hole, and Moki logo. Available in plain or serrated edge. Suggested retail \$59.95.

Blade Thickness .3/16" Made In... Switzerland

messer KLÖTZLI The name Klotzli has been known for quality cutlery in Switzerland for over 100 years. In 1846 Ernst Ulrich Klotzli founded this knife company in Burgdorf, Switzerland (home of the famous Swiss Cheese). In 1891 Ulrich Ernst Klotzli (2nd generation knifemaker) together with the founder of Victorinox, Carl Elsener, founded the Swiss Cutler Association, which is still active today. Now, five generations later, H.P. Klotzli carries on the family tradition with products that represent 147 years of expertise and knowledge in the knifemaking industry. Today's production is approximately 15,000 knives a year. These include wood carving, hunting, collector, boot and cheese knives. Each blade is hollow ground by hand and individually numbered. Handles are fit and finished by hand as well.

After twenty years of manufacturing knives for American companies, Taiyo is now producing knives under their own label. The finish and detail go far beyond the production knife category and merit the title "Factory Custom."

BIRD & TROUT Knives are flat ground and given a mirror finish. Choose from handle materials of micarta or corianne. Plain edge only.

WHAT'S DIFFERENT?

Golden Edge Cutlery is now known simply as
IRONSTONE.

Although "edge" is an everyday word in the knife industry, it's been claimed by another mail order company as their own. Rather than split hairs, we decided to change our name. Now we can continue to concentrate on providing you with top quality knives, knife-educated salespeople with good attitudes, and the money-saving free shipping you've come to expect. Our edge goes without saying...

Thank you for your continued support.

GERBER E-Z-OUT® AND E-Z-OUT JR.

These two hard-working lightweighters are Gerber's answer to one-hand opening knives. The nearly indestructible fiberglass-filled nylon handles feature a tough stainless steel clothing clip which provides a variety of carry options. A Kraton® fingertip insert has also been added to the handle to ensure a firm grip. Gerber has been making fine knives in the U.S. since 1939 and the experience shows in the E-Z-Out and E-Z-Out Jr. The blade on both models comes with either a plain edge or a half-serrated edge and has been given a non-glare finish. Suggested retail for the E-Z-Out is \$44.00. Suggested retail for the E-Z-Out Jr. is \$37.00.
